## Astronomy Among the Ancients.

The beginnings of astronomy were on the tops of towers of Babylon and the pyramids of Egypt. It is believed by many writers that both classes of structures were erected for astronomical purposes. As early as the time of Job, nearly 2,000 years before Christ, most of the stars had been divided into constellations. The writer of Job mentions Arcturus, Orion and Pleiades as being familiar. The modern science dates from the labors of Copernicus, Tycho, Brahe and Newton.

## A Famous Dwarf.

Geoffrey Hudson, the famous dwarf of Charles I., was introduced at court during the festivities attending the coronation. By an odd conceit, he was concealed in a cold pie, the crust of which being removed disclosed the dwarf fully dressed and making his bow to the king and queen. At the age of 20 he was 18 inches high, but before attaining the age of 30 he grew several inches additional. Geoffrey, like most dwarfs, was of limited intelligence, but of intense vanity and large self-conceit. It is asserted by many scientific authorities that this is a characteristic of dwarfs.

## KING OSCAR OF SWEDEN.

The Man Who May Decide the Venezuelan Question.

He is Now Sixty-Seven Years of Age—Known to the World as a Philosopher, Poet, Musician, Author and Wisest of Sovereigns.

An important figure in the Venezuelan controversy is one of the most respected monarchs in Europe. Oscar II., king of Sweden and Norway, is a man of 67, with a benevolent countenance, a full gray beard and a stalwart figure. In his youth he was a sailor, and he still retains the bluff manners of a follower of the sea.

He is the fourth sovereign of the line of Charles Jean Bernadotte, who, by a singular accident, was raised from the station of a simple burgher to that of a marshal in Napoleon's army. At the death of Charles XIII., the parliament of Sweden chose Marshal Bernadotte to succeed him, and he ascended the throne under the name of Charles XIV. He had wit enough to cut aloof from the emperor when the latter rushed on his doom, and thus at the reconstruction which followed he retained his crown and bequeathed it to his son, Oscar I. That politic monarch managed to keep out of the Schleswig-Holstein dispute, and retained the good will of both Prussia and Denmark; so he died at peace with all men, though sorely stricken in body, in the year 1859. He was succeeded by his son, Charles XV., who united Sweden and Norway, and reigned till 1872, when the present sovereign ascended the throne.

The duties of reigning are not congenial to Oscar II. He is a poet, a musician and a man of science. He has written many books, some of which are as good as if they had not been written by a king. He wrote a drama in French, which has been played to full houses. He is a corresponding member of the Frankfurt academy of sciences. His memoir of Charles XII. holds a high place in historical literature.

The task which fell upon his shoulders was one which might have appalled a less intrepid soul. He had to

KING OSCAR OF SWEDEN.

administer the government of two nations which had been artificially put together in harness, and whose aims and temper are as far apart as the poles. He had to contend against such political foes as Ibsen and Bjornsen. The latter once actually challenged the king to mortal combat. He had to handle three houses of parliament—two in Sweden, one in Norway. There has hardly been a day in his reign when he did not need to remind himself of his own apothegm—"A king must ever know how to subordinate all the inclinations of his character, however legitimate, to the exigencies of political policy."

Whenever he could, Oscar has sought relief from the cares of public business in his country house, in the sound of Helsingborg. There, with his wife, the beautiful and gifted Sophia of Nassau, and their four stalwart boys, he has led the life of a studious country gentleman, working out problems in arctic navigation and writing verses on pastoral themes. There they sit at an open window, breathing the strong air of the north, inhaling the summer breezes and letting the sea vapor fan their brows. An awning covers a veranda, bordered with flowers bathed in sunshine, from which a long stretch of sea rolls under their eyes. Here the king tells his family the old, strange sagas of Sweden's past, and carries them back to the days of Odin and the Northmen. He has a well-chosen library, full of his favorite authors. Here he loves to talk poetry and science and legend with a guest.

A brother of Oscar, Eugene, is studying to be a painter, and proposes to establish a studio in Paris. His aunt, the king's sister, Eugenie, is the Lady Bountiful of Sweden; when she failed in obtaining from the rigstard an appropriation for a workshop which was badly needed, she sold her diamonds and put up the building. When the king saw it, he cried: "But, Eugenie, where on earth did you get the money to gratify your whim?"

When it was agreed to submit the Alabama controversy to arbitration, it was suggested by Great Britain that it should be left to a European sovereign, or to the pope, or to the emperor of Brazil. The United States offered to leave it to the president of Mexico or Switzerland. An agreement was finally reached that several powers should choose each an arbitrator learned in the law, and that their joint verdict should be conclusive. The arbitrators were five in number and were chosen by the United States, Great Britain, Italy, Switzerland and Brazil. It is this precedent which has been followed in the Venezuelan case.

**Weight of Gold Coins.**  
The United States gold dollar contains 25.8 troy grains. The ordinary pound, avoirdupois, contains 7,000 grains, therefore \$1,000,000 in gold coin weighs 3,856.4 pounds avoirdupois, or over 3 tons and a half. The standard silver dollar weighs 412.5 grains, and \$1,000,000 in the United States silver coinage will weigh 56,931 pounds, or nearly 28½ tons.
